PROFESSIONAL SUMMARY

Senior Android Engineer with 11 years of experience building, modernizing, and shipping production mobile applications. Specialized in Kotlin, Jetpack Compose, Kotlin Multiplatform, Compose Multiplatform, and Android architecture, with hands-on experience across fintech, e-commerce, healthcare, logistics, retail, and consumer products. Combines deep technical execution with architecture, code review, technical ownership, and direct client collaboration.

WORK EXPERIENCE

Bitwoo — Senior Android Engineer & Owner Jul 2024 - Present
Lead mobile engineering and client delivery for a software consultancy serving international products and technology companies. Work across architecture, hands-on development, technical planning, estimation, code review, QA, releases, and direct client communication.

Selected Client Engagements

Party Tiles — Senior Android Engineer / Technical Lead

Jun 2025 - Present · Upwork · \$61K billed

- Lead a 15+ month product engagement as the primary technical point of contact for the client.
- Own requirements clarification, technical planning, estimates, delivery coordination, quality review, and release follow-up.
- Manage continued product development across changing requirements and multiple product iterations.

Daero — Senior Android Engineer

Mar 2026 - May 2026

- Delivered the Android authentication flow for a Kotlin/Jetpack Compose application using Supabase.
- Implemented email and phone OTP, deep links, session persistence, and logout using Clean Architecture.

Outdoorsy — Senior Android Engineer

Dec 2025 - Mar 2026

- Extended a mature production marketplace from RV rentals into conventional car rentals by adapting existing Android components and flows.
- Delivered the first implementation through validation and production release without known production incidents.

Falabella — Senior Android Developer

Nov 2025 - Feb 2026

- Contributed to Falabella's Android e-commerce application within a large multi-team environment.
- Implemented Android presentation and logic for CMR installment payments, including installments with and without interest.
- Worked with product, QA, and interconnected modules to protect existing checkout and payment behavior.

BITWOO — PRODUCTS & R&D

Nexus Gym — Compose Multiplatform Product

Jul 2025 - Dec 2025

- Built and shipped a gym-management product for Android and iOS using Kotlin and Compose Multiplatform.
- Supported memberships, instructors, services, recurring classes, reservations, capacity management, authentication, notifications and offline behavior.
- Released to both Google Play and the App Store.

Venus — Kotlin Multiplatform Gym MVP

Jan 2025 - Mar 2025

- Led product definition, technical supervision and delivery of an Android/iOS gym-management MVP built with Kotlin Multiplatform.
- The shared KMM layer covered application state, business logic, data, storage and Firebase integration, with Jetpack Compose on Android and SwiftUI on iOS.
- Defined the commercial proposal and configurable product model for licensing the platform to multiple gyms.

PREVIOUS PROFESSIONAL EXPERIENCE

KMA Tech — Android Engineer

Mar 2022 - Jul 2024

Places App

- Built the Android product from scratch, defining architecture and implementing restaurant discovery, menus, cart, checkout, orders, delivery, chat, promotions, and coupons.
- Integrated Stripe, Moyasar, Google Places, Firebase, Room, NFC, and deep links for deployments across the UK and Saudi Arabia.

Supervision App

- Built an Android business-management application with roles, employees, contracts, documents, chat, maps, and operational workflows.
- Implemented offline request handling and synchronization using WorkManager, caching, and Firebase Realtime Database.

Airtm — Senior Android Developer

Oct 2021 - Jun 2023

- Modernized a production fintech Android application serving 500,000+ active users during the engagement, working across Java, Kotlin, XML, and Jetpack Compose.
- Added unit tests around legacy transaction logic before extracting business rules into use cases and Clean Architecture components.
- Contributed to registration, authentication/session changes, and complex P2P transaction flows, while building a reference module adopted by the Android team.

Chiper POS — Senior Android Developer

Aug 2020 - Oct 2021

- Modernized critical areas of an Android POS application running on SUNMI hardware, migrating key flows from Java to Kotlin using MVVM and Clean Architecture.
- Contributed to sales, inventory, replenishment and offline workflows using SQLite, including integrations with printer, scanner and cash drawer.

DayToDay Health — Android Engineer

Jul 2019 - Aug 2020

- Took technical ownership of key areas of a healthcare application for pre- and post-operative care.
- Built the core care-plan engine and implemented authentication, nurse chat, vital signs, physiotherapy and diet experiences using MVP, use cases and repositories.

EARLIER EXPERIENCE

2015 - 2019

Teravision Technologies · UNICEF Kid Power · MoCaFi · Flyers Concierge · Wolftrip · Private Android Systems

Earlier Android work across Java, REST APIs, MVP/TDD, SQLite, maps, offline workflows, animations, and production applications.

EDUCATION

B.S. in Computer Engineering — Universidad Católica Andrés Bello

2012 - 2017
